

COMPANY BACKGROUND

Established in 2012, the JBM Solar team has a proven track record of securing consent for over 575MW of clean, green solar energy schemes in the UK and Ireland. JBM is focused on developing solar projects that contribute greatly in the drive to de-carbonise the UK and Ireland's electricity grids, and in turn combat the current climate crisis. Furthermore, JBM always place a key focus on community engagement and ensuring considerable biodiversity and wildlife gains are achieved at each of their sites.

JBM is focused on providing clean solar energy

Community Consultation

JBM prides itself on understanding the views of local residents in order to improve the proposals based on local knowledge and input. In order to inform residents of the proposals, consultation leaflets were sent to all properties within 1km of the site's planning boundary, alongside an ad being placed in the Hinckley and Bosworth Times print and online editions on 11th August. All parish councils representing the site, the local ward councillor and local MP were all also consulted via letter prior to the launch of the consultation.

JBM prides itself on understanding the views of local residents
